

# Assessment of Outcomes Achievement

Degree, Certificate, Program

Name of Degree, Certificate or Program: **Construction Finishing Certificate**

1. Describe assessment results.

(Provide an overall summary and analysis of student achievement of learning outcomes for this degree, certificate or program. In addition, highlight noteworthy areas where assessment results are significant, either positive or negative. Analysis should include what was learned from the assessment and an explanation of how conclusions were formed.)

I used the final exam as an assessment tool. Students did really well.

2. Identify any changes that should, as a result of this assessment, be implemented towards improving students' attainment of degree, certificate, or program outcomes.

(Recommendations might include but are not limited to: changes in outcomes, addition or deletion of certain courses in degree or certificate, addition of specific content in one or several courses, addition of specific student activities, development of a learning community, etc.) None

3. Describe your plan for implementation of any changes.

(What is the timeline for implementation? Who will be involved? Who will take the lead?) None

4. Departmental faculty involvement.

(How were relevant faculty involved in the analysis process? What part did relevant faculty play in the development of any plans for improving students' attainment of degree, certificate, or program outcomes?) Glenn

5. Evaluate the assessment strategy.

(Did the assessment strategy provide results that were meaningful? Based on the data gathered, was it possible to make reliable conclusions and to determine next steps in the interest of continuous improvement? Describe the parts of the assessment strategy that were particularly informative and those that were less than informative. How can the assessment strategy be improved?)

I feel that my assessment was good. I feel that the construction businesses offering my students jobs is a stronger reflection, but for this project the assessment tool was good.

6. Additional comments.

(Include any comments or information that did not fit well within previous bullets.)

**Thoughts from Kristen Booth:**

CONSTRUCTION-

Building Certificate is only completed EVERY OTHER YEAR (odd years)

Finishing Certificate—next year think about changing the criteria/target to be 80% of student will earn a B or better (changed from a C or better)

AAS degree-I would recommend changing the criteria to be a B not a C. ALSO, I would recommend that you list each class that you are going to use for the assessment. (for example, how we listed CTE 241 as the assessment tool on one of the certificates).
